About Elestio

Standing boilerplate for articles, press releases and partner announcements. Copy and paste as is.

Boilerplate (about 90 words)

Elestio is a managed open source platform that lets teams deploy and run more than 400 open source software packages on the cloud of their choice. Elestio handles installation, security, backups, monitoring and updates, so companies get the freedom of open source without the operational burden. Available on 9 cloud providers across 100+ regions in 20 countries, from Europe to the rest of the world, Elestio is SOC 2 and ISO 27001 certified. Operated by ELESTIO LIMITED and based in Dublin, Ireland, the company helps organisations avoid vendor lock-in and keep full control of their data and infrastructure.

ONE LINE DESCRIPTOR

Elestio: managed open source on any cloud.
